RCEF

RICE COMPETITIVENESS ENHANCEMENT FUND
SEED | MECHANIZATION | CREDIT | EXTENSION

GIYA SA MGA PARA UMA

As a major crop and staple food in the Philippines, rice has become an important part of the lives of every Filipino. The enactment of the Rice Tariffication Law (RTL) gives the government an opportunity to fully achieve rice security.

RTL liberalizes importing and exporting rice in the Philippines, replacing quantitative restriction with a purely tariff system. Likewise, the law amends the Agricultural Tariffication Act of 1996, which exempts rice from tariffication as part of the country's agreement with the World Trade Organization in 1995.

For our farmers to be sustainable and competitive even with this trade liberalization, we need to improve their productivity and income. To achieve this, we have the Rice Competitiveness Enhancement Fund (RCEF).

Through RCEF, an annual appropriation of PhP10 billion is provided for the next six years from 2019. These funds will be used to give farmers assistance in terms of farm machinery, seed development, credit, and extension service, which will be implemented in an integrated manner.

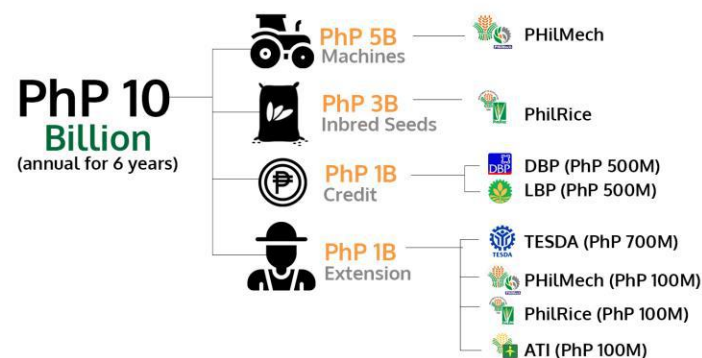

Furthermore, if the generated annual tariff revenue exceeds PhP10 billion, the excess will be earmarked in the following year for financial assistance, titling of agricultural lands, expanded crop insurance program, and crop diversification program.

“Through RCEF, we hope to uplift the practices and lives of our farmers who are our main partners in achieving rice security. Their success will pave way for available, affordable, accessible, safe, and nutritious rice for the Filipinos.”
